

ASTM Bulletins—1949

Subject Index Papers, Reports, and Articles*

A

Abrasion

Improved Single-Unit Schiefer Abrasion Testing Machine—Herbert F. Schiefer, Lawrence E. Crean, and John F. Krasny. No. 159, July, p. 73 (TP133).

Accelerated Testing

Some Observations on the Accelerated A.S.T.M. Life Test for Electrical Heating Wires—Anton deS. Brasunas and Herbert H. Uhlig. No. 161, October, p. 31 (TP175).

Acoustical Materials

Committee C-20 on Acoustical Materials Organizes. No. 157, March, p. 29; No. 159, July, p. 24.

Air Content

Discussion of the Paper on the Pressure Method for Air Content of Mortars. No. 158, May, p. 65 (TP91).

Aircraft Surfaces

Evaluation of Polishes for Use on Aluminum Aircraft Surfaces—Roy A. Machlowitz. No. 156, January, p. 46 (TP8).

Airport Runways

The Preparation of Concrete for Airport Runways—Inge Lyse. No. 161, October, p. 48 (TP192).

Alloys, Non-Ferrous

A Laboratory-Cast Pin Sample for the Spectrographic Analysis of Copper-Base Alloys—E. W. Palmer, J. P. Irwin, and C. C. Fogg. No. 160, September, p. 41 (TP139).

Magnesium Alloys and Applications—John C. McDonald. No. 159, July, p. 67 (TP127).

Aluminum

"Aluminum"—R. L. Templin. No. 158, May, p. 45 (TP71).

Aluminum Condenser and Heat Exchanger Tubes—J. S. Hamilton and J. J. Bowman. No. 159, July, p. 44 (TP104).

Evaluation of Polishes for Use on Aluminum Aircraft Surfaces—Roy A. Machlowitz. No. 156, January, p. 46 (TP8).

A Polarographic Method for the Direct Determination of Aluminum Oxide in Portland Cement—C. L. Ford and Lorraine LeMar. No. 157, March, p. 66 (TP58).

Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Anhydrite

The Use of Natural Anhydrite in Portland Cement—W. C. Hansen and J. O. Hunt. No. 161, October, p. 50 (TP194); Discussion, p. 57 (TP201).

Annual Address by President

The Progress of A.S.T.M.—R. L. Templin. No. 159, July, p. 43 (TP103).

Annual Meeting Program

Provisional Program. No. 158, May, p. 8.

Asbestos

Creep and Relaxation in Compressed Asbestos Gaskets—F. C. Thorn. No. 160, September, p. 58 (TP156).

Automatic Controlled Temperature

Apparatus for Automatic Uniform Controlled Rise of Temperature—V. C. Taxwood and C. R. Stock. No. 157, March, p. 76 (TP68).

Awards

A.S.T.M. Award of Merit Established. No. 159, July, p. 30.

B

Bleeding

Laboratory Testing of Resistance of Traffic Paint to Bleeding—Fred S. Byerly. No. 160, September, p. 52 (TP150).

* Reprints of this Subject and Author Index are available to members on request.

Blister Failure

Effect of Temperature on the Rate of Blister Failure of Finishes on Steel in Water Immersion Tests—J. A. Boylan and R. I. Wray. No. 157, March, p. 53 (TP45).

Burning Characteristics

Ignition and Burning Characteristics of Polyester, Phenolic, and Melamine Fibrous Glass Laminates—H. J. Stark. No. 162, December, p. 55 (TP223).

By-laws Change

By-laws Change Proposed on Honorary Memberships. No. 157, March, p. 25.

C

Calorimeter

Simple Calorimeter for Specific Heat Measurements—Roger B. Rice. No. 157, March, p. 72 (TP64).

Cathode Tubes

see Radio Tubes

Cement

Important Announcements on Portland Cement Testing. No. 156, January, p. 24.

The Nonevaporable Water Content of Hardened Portland-Cement Paste—Its Significance for Concrete Research and Its Method of Determination—Trevall C. Powers. No. 158, May, p. 68 (TP94).

A Polarographic Method for the Direct Determination of Aluminum Oxide in Portland Cement—C. L. Ford and Lorraine LeMar. No. 157, March, p. 66 (TP58).

Testing Surface Waterproofers—F. O. Anderegg. No. 156, January, p. 71 (TP33); Discussion, p. 76 (TP38).

The Use of Natural Anhydrite in Portland Cement—W. C. Hansen and J. O. Hunt. No. 161, October, p. 50 (TP194); Discussion, p. 57 (TP201).

Cement Flow Table

Improved Flow Table Design Developed by Cement Committee. No. 156, January, p. 24.

Ceramic Whitewares

Scope and Personnel of New Technical Committee on Ceramic Whitewares. No. 157, March, p. 28.

Charpy Impact

see Impact Testing

Chromic Acid

Discussion of the Paper on Action of Chromic Acid on Zinc Coatings. No. 156, January, p. 49 (TP11).

Clays

Thixotropic Strength Regain of Clays—Louis Berger and John Gnaedinger. No. 160, September, p. 64 (TP162).

Coatings

The Concept of Organic Coating Hardness—M. H. Switzer. No. 156, January, p. 67 (TP29).

Color Density of Liquids

A Rapid Photoelectric Method for Determination of the Relative Color Density of Liquids—Louis Lykken and John Rae, Jr. No. 160, September, p. 47 (TP145).

Compression Testing

The Use of Natural Anhydrite in Portland Cement—W. C. Hansen and J. O. Hunt. No. 161, October, p. 50 (TP194); Discussion, p. 57 (TP201).

Thixotropic Strength Regain of Clays—Louis Berger and John Gnaedinger. No. 160, September, p. 64 (TP162).

Concrete

The Nonevaporable Water Content of Hardened Portland-Cement Paste—Its Significance for Concrete Research and Its Method of Determination—Trevall C. Powers. No. 158, May, p. 68 (TP94).

The Preparation of Concrete for Airport Runways—Inge Lyse. No. 161, October, p. 48 (TP192).

Consistency

A Direct Reading Attachment for the Stormer Viscometer—H. B. Klimper, L. P. Larson, and J. H. Calbeck. No. 161, October, p. 33 (TP177).

A Method for the Standardization of Krebs Modified Stormer Viscometers—C. F. Jackson and W. H. Madson. No. 161, October, p. 36 (TP180).

Copper

A Laboratory-Cast Pin Sample for the Spectrographic Analysis of Copper-Base Alloys—E. W. Palmer, J. P. Irwin, and C. C. Fogg. No. 160, September, p. 41 (TP139).

Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Corrosion

Discussion of the Paper on Action of Chromic Acid on Zinc Coatings. No. 156, January, p. 49 (TP11).

Discussion of Paper on Visual Rating of Rusted Steel Specimens. No. 162, December, p. 67 (TP235).

Inter-Society Corrosion Committee Formed. No. 157, March, p. 37.

Creep

Creep and Relaxation in Compressed Asbestos Gaskets—F. C. Thorn. No. 160, September, p. 58 (TP156).

D

Diesel Fuels

The Precision of Fuel Rating, 1942 to 1946—Donald B. Brooks and Robetta B. Cleaton. No. 156, January, p. 56 (TP18).

District Activities

see Meetings.

Drying Tests

Panel Discussion on "Practical Aspects of the Testing of Paint and Varnish Products." No. 161, October, p. 39 (TP183).

Durability

A New Durability Test for Marble—D. W. Kessler. No. 159, July, p. 45 (TP105).

E

Elasticity

Discussion of Paper Regarding the Sonic Determination of Modulus of Elasticity Using Round-Section Bars. No. 159, July, p. 49 (TP109).

University of Michigan Summer Session to Emphasize Theory of Elasticity and Structures. No. 158, May, p. 76 (TP102).

Electrical Contacts

Bibliographical Abstracts Issued (Metal Cleaning and Electrical Contacts). No. 160, September, p. 13.

Electrical Heating Wires

Some Observations on the Accelerated A.S.T.M. Life Test for Electrical Heating Wires—Anton deS. Brasunas and Herbert H. Uhlig. No. 161, October, p. 31 (TP175).

Electrical Insulating Material

Electrical Method for Evaluation of Protective Coating as Moisture Barriers—Marion A. Arthur. No. 160, September, p. 57 (TP155).

Elongation

A Method of Determining the Percentage Elongation at Maximum Load in the Tension Test—Paul G. Nelson and Joseph Winlock. No. 156, January, p. 53 (TP15); No. 162, December, p. 46 (TP214).

F

Fatigue Testing

Approximate Statistical Method for Fatigue Data—R. E. Peterson. No. 156, January, p. 50 (TP12); Discussion, No. 158, May, p. 62 (TP88); No. 159, July, p. 65 (TP125).
Influence of Type of Machine, Range of Speed, and Specimen Shape on Fatigue Test Data—P. K. Roos, D. C. Lemmon, and J. T. Ransom. No. 158, May, p. 63 (TP89).

Films

Some Notes on the Effect of Testing Machines on the Tensile Properties of Plastic Films—Ladislav Boor. No. 162, December, p. 47 (TP215).

Finances

Financial Highlights—1948. No. 157, March, p. 25.

Flexure Tests

The Significance of the Charpy and Flexure Tests in Evaluating the Impact Resistance of Plastics—H. M. Quackenbos, Jr., J. M. Hill, Jr., and C. E. Staff. No. 159, July, p. 56 (TP116).

Flooring Materials

Floor Waxes, Hard-Surfaced Flooring Materials, and Graphite Under Consideration for New A.S.T.M. Technical Committees. No. 157, March, p. 30.

Fuel Rating

The Precision of Fuel Rating—Donald B. Brooks and Robetta B. Cleaton. No. 156, January, p. 56 (TP18).

G

Galvanized Sheet and Wire

Discussion on the Paper on Action of Chromic Acid on Zinc Coatings. No. 156, January, p. 49 (TP11).

Gaskets

Creep and Relaxation in Compressed Asbestos Gaskets—F. C. Thorn. No. 160, September, p. 58 (TP156).

Gasoline

The Precision of Fuel Rating, 1942 to 1946—Donald B. Brooks and Robetta B. Cleaton. No. 156, January, p. 56 (TP18).

Geiger-Müller Counter Method

A Geiger-Müller Counter Method of Determining Phosphorus in Steels—Ford R. Bryan and George A. Nahstoll. No. 157, March, p. 55 (TP47).

Glass

Ignition and Burning Characteristics of Polyester, Phenolic, and Melamine Fibrous Glass Laminates—H. J. Stark. No. 162, December, p. 55 (TP223).

Gold

Recent Milestones in Metals and Minerals—John D. Sullivan. No. 165, January, p. 41 (TP3).

Graphite

Floor Waxes, Hard-Surfaced Flooring Materials, and Graphite Under Consideration for New A.S.T.M. Technical Committees. No. 157, March, p. 30.

H

Hardness Testing

The Concept of Organic Coating Hardness—M. H. Switzer. No. 156, January, p. 67 (TP29).

A History of Hardness Tests Based on Scratch Resistance Measurements—Ernest C. Bernhardt. No. 157, March, p. 49 (TP41).

Heat Exchanger Tubes

Aluminum Condenser and Heat Exchanger Tubes—J. S. Hamilton and J. J. Bowman. No. 159, July, p. 44 (TP104).

Highway Centerlines

A Direct Reading Portable Photoelectric Photometer for Determining Reflectance of Highway Centerlines—John M. Hill and Howard W. Ecker. No. 159, July, p. 69 (TP129).

I

Impact Testing

Impact Testing of Plastics: Elimination of the Toss Factor—Bryce Maxwell and L. F. Rahm. No. 161, October, p. 44 (TP188). Discussion, p. 47 (TP191).

Investigation of Square Sub-sized V-Notched Charpy Specimens—Donald C. Buffum. No. 160, September, p. 45 (TP143).

The Significance of the Charpy and Flexure Tests in Evaluating the Impact Resistance of Plastics—H. M. Quackenbos, Jr., J. M. Hill, Jr., and C. E. Staff. No. 159, July, p. 56 (TP116).

Ignition Characteristics

Ignition and Burning Characteristics of Polyester, Phenolic, and Melamine Fibrous Glass Laminates—H. J. Stark. No. 162, December, p. 55 (TP233).

Industrial Water

Round-Table Discussion on Standards for Water-Borne Wastes. No. 162, December.

Introduction—L. Kermit Herndon, p. 35 (TP203).

Gaging and Sampling of Water-Borne Industrial Wastes—C. F. Hauck, p. 38 (TP206).

Analysis of Water-Borne Industrial Wastes—George D. Beal and S. A. Braley, p. 36 (TP204).

Joint Discussion, p. 43 (TP211).

Insulating Materials

Measurement of the Thermal Transmission of Textile Fabrics—Gerald Winston and Stanley Backer. No. 162, December, p. 62 (TP230).

Insulating Oil

Three Papers in Insulating Oil Symposium. No. 156, January, p. 26.

Iron

Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Spectrographic Methods for Determining Magnesium in Nodular Iron—Ford R. Bryan, G. A. Nahstoll, and H. D. Veldhuis. No. 162, December, p. 69 (TP237).

Izod Impact

see Impact Testing

K

Knock Test

The Precision of Fuel Rating, 1942 to 1946—Donald B. Brooks and Robetta B. Cleaton. No. 156, January, p. 56 (TP18).

L

Lead

Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Lime

Nomograms for Obtaining the Compound Composition of Hydrated Limes from the Oxide Analysis—Ernest M. Levin. No. 162, December, p. 58 (TP226).

M

Magnesium

Magnesium Alloys and Applications—John C. McDonald. No. 159, July, p. 67 (TP127).

Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Spectrographic Methods for Determining Magnesium in Nodular Iron—Ford R. Bryan, G. A. Nahstoll, and H. D. Veldhuis. No. 162, December, p. 69 (TP237).

Marble

A New Durability Test of Marble—D. W. Kessler. No. 159, July, p. 45 (TP105).

Meetings

Committee on Arrangements Appointed for West Coast Meeting. No. 157, March, p. 6.

District Meetings: No. 156, January p. 22; No. 157, March, p. 27; No. 158, May, p. 29; No. 160, September, p. 16; No. 161, October, p. 14; No. 162, December, p. 21.

Fifty-second Annual Meeting. No. 156, January, p. 12; No. 159, July, p. 5.

Los Angeles Air Pollution. No. 156, January, p. 22.

Pacific Area National Meeting. No. 156, January, p. 12; No. 158, May, p. 20; No. 159, July, p. 28; No. 160, September, p. 5; No. 262, December, p. 18.

1949 Spring Meeting. No. 156, January, p. 10; No. 157, March, pp. 7 and 9.

Three Papers in Insulating Oil Symposium. No. 156, January, p. 26.

Metal Cleaning

Application of the Radioactive Tracer Technique to Metal Cleaning—J. C. Harris, R. E. Kamp, and W. H. Yanko. No. 158, May, p. 49 (TP75).

Bibliographical Abstracts Issued (Metal Cleaning and Electrical Contacts). No. 160, September, p. 13.

Metal Polishes

Evaluation of Polishes for Use on Aluminum Aircraft Surfaces—Roy A. Machlowitz. No. 156, January, p. 46 (TP8).

Metal Powders

A Compressibility Test for Metal Powders—F. V. Lenel. No. 158, May, p. 52 (TP78).

Moisture Barriers

Electrical Method for Evaluation of Protective Coating as Moisture Barriers—Marion A. Arthur. No. 160, September, p. 57 (TP155).

Mortars

Discussion of the Paper on the Pressure Method for Air Content of Mortars. No. 158, May, p. 65 (TP91).

N

Naval Ordnance Laboratory

Naval Ordnance Laboratory—White Oak. No. 158, May, p. 34.

Non-Destructive Testing

Spectrographic Methods for Determining Magnesium in Nodular Iron—Ford R. Bryan, G. A. Nahstoll, and H. D. Veldhuis. No. 162, December, p. 69 (TP237).

Nomograms

Nomograms for Obtaining the Compound Composition of Hydrated Limes from the Oxide Analysis—Ernest M. Levin. No. 162, December, p. 58 (TP226).

O

Organic Coatings

The Concept of Organic Coating Hardness—M. H. Switzer. No. 156, January, p. 67 (TP29).

Oxide Analysis

Nomograms for Obtaining the Compound Composition of Hydrated Limes from the Oxide Analysis—Ernest M. Levin. No. 162, December, p. 58 (TP226).

P

Pacific Area National Meeting

Pacific Area National Meeting. No. 156, January, p. 12; No. 158, May, p. 20; No. 159, July, p. 28; No. 160, September, p. 5; No. 162, December, p. 18.

Packages

Performance Testing of Packages in Relation to Handling and Shipping—Julian Harrison Toulouse. No. 159, July, p. 50 (TP110).

Paint

The Concept of Organic Coating Hardness—M. H. Switzer. No. 156, January, p. 67 (TP29).

A Direct Reading Attachment for the Stormer Viscometer—H. B. Klimper, L. P. Larson, and J. H. Calbeck. No. 161, October, p. 33 (TP177).

Effect of Temperature on the Rate of Blister Failure of Finishes on Steel in Water Immersion Tests—J. A. Boylan and R. I. Wray. No. 157, March, p. 53 (TP45).

Federation Activities on Paint. No. 157, March, p. 24.

Important New and Revised Standards on Steel, Paint and Paint Materials, Plastics, and Non-Ferrous Metals. No. 158, May, p. 22.

Laboratory Testing of Resistance of Traffic Paint to Bleeding—Fred S. Byerly. No. 160, September, p. 52 (TP150).

Panel Discussion on "Practical Aspects of the Testing of Paint and Varnish Products." No. 161, October, p. 39 (TP183).

Photoelectric Method

A Rapid Photoelectric Method for Determination of the Relative Color Density of Liquids—Louis Lykken and John Rae, Jr. No. 160, September, p. 47 (TP145).

Photoelectric Photometer

A Direct Reading Portable Photoelectric Photometer for Determining Reflectance of Highway Centerlines—John M. Hill and Howard W. Ecker. No. 159, July, p. 69 (TP129).

Phosphorus

A Geiger-Müller Counter Method of Determining Phosphorus in Steels—Ford R. Bryan and George A. Nahstoll. No. 157, March, p. 55 (TP47).

Plastics

Ignition and Burning Characteristics of Polyester, Phenolic, and Melamine Fibrous Glass Laminates—H. J. Stark. No. 162, December, p. 55 (TP223).

Impact Testing of Plastics: Elimination of the Toss Factor—Bryce Maxwell and L. F. Rahm. No. 161, October, p. 44 (TP188); Discussion, p. 47 (TP191).

Important New and Revised Standards on Steel, Paint and Paint Materials, Plastics, and Non-Ferrous Metals. No. 158, May, p. 22.

The Significance of the Charpy and Flexure Tests in Evaluating the Impact Resistance of Plastics—H. M. Quackenbos, Jr., J. M. Hill, Jr., and C. E. Staff. No. 159, July, p. 56 (TP116).

Some Notes on the Effect of Testing Machines on the Tensile Properties of Plastic Films—Ladislav Boor. No. 162, December, p. 47 (TP215).

Plastic Films

Method for Weight Loss of Plastic Films and Sheets on Heating—Maurice E. Marks. No. 159, July, p. 53 (TP113).

Polishes

Evaluation of Polishes for Use on Aluminum Aircraft Surfaces—Roy A. Machlowitz. No. 156, January, p. 46 (TP8).

Porcelain Enamel

News of New Committees on Acoustical Materials and Porcelain Enamel. No. 157, March, p. 29; also No. 160, September, p. 30.

Powder Metallurgy

A Compressibility Test for Metal Powders—F. V. Lenel. No. 158, May, p. 52 (TP78).

Presentation of Data

Approximate Statistical Method for Fatigue Data—R. E. Peterson. No. 156, January, p. 50 (TP12). Discussion, No. 158, May, p. 62 (TP88); No. 159, July, p. 65 (TP125).

Presidents Address and Talks

"Aluminum"—R. L. Templin. No. 158, May, p. 45 (TP71).
The Progress of A.S.T.M. No. 159, July, p. 43 (TP103).

Pressure Method

Discussion of the Paper on the Pressure Method for Air Content of Mortars. No. 158, May, p. 65 (TP91).

Programs

Provisional Program. No. 158, May, p. 8.

Protective Coatings

Electrical Method for Evaluation of Protective Coatings as Moisture Barriers—Marion A. Arthur. No. 160, September, p. 57 (TP155).

Publications

Extensive Publication Schedule for 1949-1950. No. 160, September, p. 11; No. 161, October, p. 10.

R

Radio Tubes

Radio Tube Cathode Studies to Continue Intensively; Results Briefed. No. 156, January, p. 23.

Radioactive Tracer Technique

Application of the Radioactive Tracer Technique to Metal Cleaning—J. C. Harris, R. E. Kamp, and W. H. Yanko. No. 158, May, p. 49 (TP75).

Rayon

The Definition of Rayon. No. 156, January, p. 29.

Reflectance

A Direct Reading Portable Photoelectric Photometer for Determining Reflectance of Highway Centerlines—John M. Hill and Howard W. Ecker. No. 159, July, p. 69 (TP129).

Rubber

Study of A.S.T.M. Tentative Stiffness Test as Applied to Rubber—Dietrich G. Stechert. No. 157, March, p. 61 (TP53).

Symposium on Aging of Rubbers Features Spring Meeting. No. 157, March, p. 7.

Rust

Discussion of Paper on Visual Rating of Rusted Steel Specimens. No. 162, December, p. 67 (TP235).

S

Scratch Resistance

A History of Hardness Tests Based on Scratch Resistance Measurements—Ernest C. Bernhardt. No. 157, March, p. 49 (TP41).

Screw Threads

Unification of Screw Thread Standards—A Major Accomplishment. No. 157, March, p. 38.

Setting Time

The Use of Natural Anhydrite in Portland Cement—W. C. Hansen and J. O. Hunt. No. 161, October, p. 50 (TP194); Discussion, p. 57 (TP201).

Shipping Containers

Performance Testing of Packages in Relation to Handling and Shipping—Julian Harrison Toulouse. No. 159, July, p. 50 (TP110).

Simulated Service Testing

Performance Testing of Packages in Relation to Handling and Shipping—Julian Harrison Toulouse. No. 159, July, p. 50 (TP110).

Significance of Naval Testing—Ellsworth F. Seaman. No. 160, September, p. 62 (TP160).

Soils

Thixotropic Strength Regain of Clays—Louis Berger and John Gnaedinger. No. 160, September, p. 64 (TP162).

Sonic Testing

Discussion of the Paper Regarding the Sonic Determination of Modulus of Elasticity Using Round-Section Bars. No. 159, July, p. 49 (TP109).

Spectrographic Analysis

A Laboratory-Cast Pin Sample for the Spectrographic Analysis of Copper-Base Alloys—E. W. Palmer, J. P. Irwin, and C. C. Fogg. No. 160, September, p. 41 (TP139).

Nomenclature in Applied Spectroscopy to Be Covered by Joint Committee. No. 157, March, p. 30.

Spectrographic Methods for Determining Magnesium in Nodular Iron—Ford R. Bryan, G. A. Nahstoll, and H. D. Veldhuis. No. 162, December, p. 69 (TP237).

Speed of Testing

Effect of Speed of Testing on the Tensile Properties of Austenitic Stainless Steel Sheets—R. H. Heyer. No. 158, May,

p. 57 (TP83). Discussion, No. 162, December, p. 53 (TP221).
Speed of Testing—F. G. Tatnall. No. 161, October, p. 23 (TP167).

Standards and Standardization

Actions by Standards Committee Affect Plastics, Electronic Devices, Glass Containers, and Asbestos. No. 160, September, p. 10.

A.S.T.M. Specifications Used for Steel for Petroleum. No. 157, March, p. 21.

A.S.T.M. Standards in Housing Requirements. No. 158, May, p. 27.

Color Transparency Standards for the Visual Classification of Natural Muscovite Block Mica Now Available. No. 158, May, p. 30.

How An A.S.T.M. Standard Gets That Way. No. 156, January, p. 20.

Important New and Revised Standards on Steel, Paint and Paint Materials, Plastics, and Non-Ferrous Metals. No. 158, May, p. 22.

List of New and Revised Tentatives with Serial Designations. No. 159, July, p. 27.

Many New Specifications and Tests Accepted. No. 161, October, p. 5.

A Method for the Standardization of Krebs Modified Stormer Viscometers—C. F. Jackson and W. H. Madson. No. 161, October, p. 36 (TP180).

1948 a Noteable Year for Advancing A.S.T.M. Work in Materials. No. 156, January, p. 5.

Outline of Standardization Procedure of the A.S.T.M. January, p. 21.

Philosophy of Specifications—L. S. Reid and W. R. Willets. No. 156, January, p. 39 (TP1).

Recent Actions on Standards (Steel, Aluminum, Glass, Roofing Materials, Electrical Insulating Materials). No. 156, January, p. 14.

Recommended Editorial Revisions in Tolerances in Dimensions of the Blaine Air-Permeability Apparatus for Determining the Fineness of Portland Cement. No. 156, January, p. 25.

The Standardization and Simplification of Steel Products—L. H. Winker and J. G. Morrow. No. 157, March, p. 20.

Standards Widely Used in Specifying and Purchasing Materials in Production and Distribution; Also in Spearheading Research. No. 160, September, p. 14; No. 161, October, p. 13; No. 162, December, p. 19.

Testing and the Federal Trade Commission. No. 157, March, p. 22.

Unification of Screw Thread Standards—A Major Accomplishment. No. 157, March, p. 38.

What Good Are Standards? (Abstracts of papers presented at an A.S.A. Meeting.) No. 157, March, p. 13.

Statistical Analysis

Approximate Statistical Method for Fatigue Data—R. E. Peterson. No. 156, January, p. 50 (TP12); Discussion, No. 158, May, p. 62 (TP88); No. 159, July, p. 65 (TP125).

Steel

Effect of Speed of Testing on the Tensile Properties of Austenitic Stainless Steel Sheets—R. H. Heyer. No. 158, May, p. 57 (TP83). Discussion, No. 162, December, p. 53 (TP221).

Effect of Temperature on the Rate of Blister Failure of Finishes on Steel in Water Immersion Tests—J. A. Boylan and R. I. Wray. No. 157, March, p. 53 (TP45).

Discussion of Paper on Visual Rating of Rusted Steel Specimens. No. 162, December, p. 67 (TP235).

A Geiger-Müller Counter Method of Determining Phosphorus in Steels—Ford R. Bryan and George A. Nahstoll. No. 157, March, p. 55 (TP47).

Important New and Revised Standards on Steel, Paint and Paint Materials, Plastics, and Non-Ferrous Metals. No. 158, May, p. 22.

A Method of Determining the Percentage Elongation at Maximum Load in the Tension Test—Paul G. Nelson and Joseph Winlock. No. 156, January, p.

Steels (continued)

- 53 (TP15); No. 162, December, p. 46 (TP215).
The Standardization and Simplification of Steel Products—L. H. Winkler and J. G. Morrow. No. 157, p. 20.

Stiffness Test

- Study of A.S.T.M. Tentative Stiffness Test as Applied to Rubber—Dietrich G. Stechert. No. 157, March, p. 61 (TP53).

Strain Gages

- Strain Gages for Large Plastic Strains and Combined Stresses—Joseph Marin. No. 161, October, p. 28 (TP172).

T

Tension Testing

- A Method of Determining the Percentage Elongation at Maximum Load in the Tension Test—Paul G. Nelson and Joseph Winlock. No. 156, January, p. 53 (TP15); No. 162, December, p. 46 (TP214).

- Effect of Speed of Testing on the Tensile Properties of Austenitic Stainless Steel Sheets—R. H. Heyer. No. 158, May, p. 57 (TP83). Discussion, No. 162, December, p. 53 (TP221).

- Simplified Preparation of Flat Specimens for Tensile Strength Tests—V. C. Taxwood. No. 157, March, p. 77 (TP69). Discussion, No. 162, December, p. 72 (TP240).

- Some Notes on the Effect of Testing Machines on the Tensile Properties of Plastic Films—Ladislav Boor. No. 162, December, p. 47 (TP215).

- Strain Gages for Large Plastic Strains and Combined Stresses—Joseph Marin. No. 161, October, p. 28 (TP172).

- Tension Testing of Fabrics. No. 156, January, p. 27.

Test Specimen

- Investigation of Square Sub-sized V-Notched Charpy Specimens—Donald C. Buffum. No. 160, September, p. 45 (TP143).

- Simplified Preparation of Flat Specimens for Tensile Strength Tests—V. C. Taxwood. No. 157, March, p. 77 (TP69). Discussion, No. 162, December, p. 72 (TP240).

Textiles

- Accelerated Aging Tests Devised and Combined to Simulate Use of Fabrics. No. 158, May, p. 34.

- Improved Single-Unit Schiefer Abrasion Testing Machine—Herbert F. Schiefer, Lawrence E. Crean, and John F. Krasny. No. 159, July, p. 73 (TP133).

- Measurement of the Thermal Transmission of Textile Fabrics—Gerald Winston and Stanley Backer. No. 162, December, p. 62 (TP230).

- Report on ISO Conference on Textiles. No. 156, January, p. 18.

- Textiles on The International Front. No. 156, January, p. 18.

- A Universal Yarn Numbering System. No. 156, January, p. 28.

Thermal Insulation

- Measurement of the Thermal Transmission of Textile Fabrics—Gerald Winston and Stanley Backer. No. 162, December, p. 62 (TP230).

Thixotropic Strength

- Thixotropic Strength Regain of Clays—Louis Berger and John Gnaedinger. No. 160, September, p. 64 (TP162).

Tin

- Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Titanium

- Recent Milestones in Metals and Minerals—John D. Sullivan. No. 156, January, p. 41 (TP3).

Torsion Testing

- Strain Gages for Large Plastic Strains and Combined Stresses—Joseph Marin. No. 161, October, p. 28 (TP172).

- A Torsion Testing Machine of 2,000,000 Inch-Pound Capacity—F. K. Chang, K. Endre Knudsen, and Bruce G. Johnston. No. 160, September, p. 49 (TP147).

Toss Factor

- Impact Testing of Plastics: Elimination of the Toss Factor—Bryce Maxwell and L. F. Rahm. No. 161, October, p. 44 (TP188); Discussion, p. 47 (TP191).

Traffic Paint

- Laboratory Testing of Resistance of Traffic Paint to Bleeding—Fred S. Byerly. No. 160, September, p. 52 (TP150).

- A Direct Reading Portable Photoelectric Photometer for Determining Reflectance of Highway Centerlines—John M. Hill and Howard W. Ecker. No. 159, July, p. 69 (TP129).

U

Universal Yarn Numbering System.

- A Universal Yarn Numbering System. No. 156, January, p. 28.

V

Varnish

- Panel Discussion of "Practical Aspects of the Testing of Paint and Varnish Products." No. 161, October, p. 39 (TP183).

Viscosity

- A Direct Reading Attachment for the Stormer Viscometer—H. B. Klimper, L. P. Larson, and J. H. Calbeck. No. 161, October, p. 33 (TP177).

- A Method for the Standardization of Krebs Modified Stormer Viscometers—C. F. Jackson and W. H. Madson. No. 161, October, p. 36 (TP180).

Volatility

- Method for Weight Loss of Plastic Films and Sheets on Heating—Maurice E. Marks. No. 159, July, p. 53 (TP113).

W

Water

- Round-Table Discussion on Standards for Water-Borne Wastes. No. 162, December.

- Introduction—L. Kermit Herndon, p. 35 (TP203).

- Gaging and Sampling of Water-Borne Industrial Wastes—C. F. Hauck, p. 38 (TP206).

- Analysis of Water-Borne Industrial Wastes—George D. Beal and S. A. Braley, p. 36 (TP204).

- Joint Discussion, p. 43 (TP211).

Water Content

- The Nonevaporable Water Content of Hardened Portland-Cement Paste—Its Significance for Concrete Research and Its Method of Determination—Trevall C. Powers. No. 158, May, p. 68 (TP94).

Waterproofing

- Testing Surface Waterproofers—F. O. Anderegg. No. 156, January, p. 71 (TP33); Discussion, p. 76 (TP38).

- Electrical Method for Evaluation of Protective Coatings as Moisture Barriers—Marion A. Arthur. No. 160, p. 57 (TP155).

Waxes

- Floor Waxes, Hard-Surfaced Flooring Materials, and Graphite Under Consideration for New A.S.T.M. Technical Committees. No. 157, March, p. 30.

Weathering

- A New Durability Test for Marble—D. W. Kessler. No. 159, July, p. 45 (TP105).

Weight Loss

- Method for Weight Loss of Plastic Films and Sheets on Heating—Maurice E. Marks. No. 159, July, p. 53 (TP113).

Wire

- Some Observations on the Accelerated A.S.T.M. Life Test for Electrical Heating Wires—Anton deS. Brasunas and Herbert H. Uhlig. No. 161, October, p. 31 (TP175).

Wood Poles

- Program for Testing Wood Poles to Determine Allowable Fiber Stresses—L. G. Smith. No. 160, September, p. 32.

Wool

- A Report on the International Wool Conference in Amsterdam, Holland. No. 156, January, p. 31.

X

X-ray Diffraction Data

- Revised Card Index File of X-ray Diffraction Data for Identification of Crystalline Materials to Be Issued Soon. No. 160, September, p. 18.

Y

Yarn Numbering System

- A Universal Yarn Numbering System. No. 156, January, p. 28.

Z

Zinc Coatings

- Discussion of the Paper on Action of Chromic Acid on Zinc Coatings. No. 156, January, p. 49 (TP111).
